

In reference to the LPFM stations taking priority over translator stations, I do not agree. The station I listen to most is a translator station. 102.3 K-LOVE in Wilmington OH. I listen to this station the vast majority of the time. It is a station that is family friendly and listener supported. It covers the news I need to know. It is the station all of my friends listen to the majority of the time as well. It is a listener supported station. If it is not being supported it will be replaced by a local station. If there is no one listening, It won't be supported. To take away a station that the local people are supporting and enjoying would be a disservice to our community. That would be just another instance of our government thinking it knows what is better for us. How wrong is that?
